Anaerobe Jar

The Almore anaerobe jar is specially designed for atmospheric stability and durability. It is unbreakable, lightweight, transparent, and autoclavable. A double screw clamp, coupled with the patented Quad-Ring™ gasket, ensures a more positive seal, superior to conventional O-rings. The screw clamp lid also doubles as a handy carrying handle. The 3/8 inch thick anodized aluminum lid will not warp. It is guaranteed to resist cracking or breaking for ten years. This product is shipped complete with a stainless steel rack to accommodate up to 14 standard sized petri plates (15x100mm).

AnaeroGen™

AnaeroGen™ Compact Bag System

AnaeroGen™ Compact is a system for rapidly generating an anaerobic environment necessary to cultivate anaerobic microorganisms. The AnaeroGen™ Compact system consists of an AnaeroGen™ sachet, oxygen impermeable pouch, and sealing clip. Each pouch is large enough to hold four 15x100mm petri plates.

Anaerogen™ Jar System

AnaeroGen™ Jar System is a system for rapidly generating an anaerobic environment necessary to cultivate anaerobic microorganisms within a sealed jar. The AnaeroGen™ system consists of an AnaeroGen™ sachet and an oxygen indicator.

- No catalyst needed and no water required for activation. Sachet is activated once opened
- No potentially explosive hydrogen gas produced
- Final atmosphere is less than 1% oxygen; ideal for the growth of anaerobes
- No dangerous build-up of pressure; the sachet acts as an oxygen scavenger
- Anaerobic conditions reached within 30 minutes

CampyGen™

CampyGen™ Compact Bag System

CampyGen™ Compact is a system for rapidly generating a microaerophilic environment necessary to cultivate *Campylobacter* spp. The CampyGen™ Compact system consists of a CampyGen™ sachet, an oxygen impermeable pouch, and a sealing clip. Each pouch is large enough to hold four 15x100mm petri plates.

CampyGen™ Jar System

CampyGen™ is a system for rapidly generating a microaerophilic environment necessary to cultivate *Campylobacter* spp. within a sealed jar. The CampyGen™ jar system consists of a CampyGen™ sachet for use within a gas jar.

- No catalyst needed and no water required for activation. Sachet is activated once opened
- No dangerous build-up of pressure; the sachet acts as an oxygen scavenger
- Final atmosphere with 6% oxygen; ideal for the growth of *Campylobacter* spp. and other microaerophilic organisms
